Brink 57, Amstelveen,
The Netherlands

*Nationality: Dutch (The Netherlands)

EXPERIENCE

Post-Doc Researcher (Data/AI Focus) Mar 2023 – Till date
AmsterdamUMC, The Netherlands

- Designed and implemented an R-based ETL pipeline to process raw accelerometer data from ABCD cohort participants.
- Served as Dissemination and Communication Lead for the EU-LABDA project, coordinating scientific outputs and outreach.
- Acted as Machine Learning Implementation Advisor for the EU-SmartChange project, supporting pilot study setup and integration.
- Ensured GDPR compliance by using cloudbased myDRE, a secure research environment, for team collaboration and data protection

Tech: R, Data analysis, myDRE, Machine learnig, Publications, Teaching

Software Developer and IT Trainer Feb 2013 - Aug 2016
K.K.K. University Karak, Pakistan

- Developed and delivered curriculum on C++, and Data Structures to 100+ students, resulting in a 15% improvement in final project scores.
- Developed online admission system and maintained the university website (www.kkkuk.edu.pk).

Tech: C++, C, Wordpress, Css, PHP

Services and IT Operations Manager Jul 2010 - Feb 2013
United Bank Limited, Pakistan

- Served as technical consultant during the bank's core system migration from on-premise to cloud, ensuring minimal disruption and secure data handling.
- Coordinated with IT and infrastructure teams to support data integrity, access control, and system performance during migration.
- Managed operational workflows including account onboarding, remittances, foreign currency transactions, and trade—gaining deep insight into structured financial data processes.

EDUCATION

Vrije University Amsterdam 2017 - 2023
PhD - AI, computational modeling, ehealth, HCI

FAST- NUCES, Pakistan 2007 - 2009
Master in Computer Science

ABOUT ME

With a strong academic background and over eight years of data-driven research and management experience, I possess hands-on expertise in health informatics, Python development, and managerial oversight. I am adept at designing scalable data processing workflows and collaborating effectively with cross-functional teams on diverse research projects. I am actively seeking a challenging role in data science where I can contribute to building reliable, testable data pipelines and delivering valuable insights.

SKILLS

Programming Languages: Python (Pandas, NumPy, Scikit-learn), SQL, R, C++, MATLAB

AI & Modeling: Mathematical Modeling, HCI, Machine Learning (Implementation in pilot studies), Time-Series Sensor Analysis

Data Science & Engineering: ETL Pipelines, Object-Oriented Programming (OOP), Data Cleaning, Data Modeling, visualization (Power BI). Gephi, NetworkX

Databases & Tools: Microsoft SQL Server, Power BI, Git, Cloud-platform (Firebase, GCP)

Communication and leadship skills: Project & Operational Leadership, Cross-functional Collaboration, Data Storytelling, and Research Translation.

RESEARCH

Published **peer-reviewed articles in digital health, AI, and behavior modeling** (e.g., JMIR MHealth), focusing on personalized interventions, and agent-based simulations.

More than 11 arcticles, with **citation score of 200+**
